

TRAILER PROJECT: PLOT INFORMATION

Movie trailers incorporate a number of short action scenes reflecting the plot of the story. They usually have a beginning, middle and end but never give away the conclusion.

Record the main plot points for each chapter of your novel in order to choose which scenes you will feature in your trailer. Keep in mind that your trailer must tell a story. Choose the scenes carefully for this purpose. Also, consider the elements of a trailer discussed in class (ie. humour, romance, suspense, etc.) and be sure to include scenes that reflect these traits. When the chart is complete, choose at least 5 - 10 scenes that you will film with your group. Describe how you will feature these scenes in your trailer.
